Dear Sir/Madam

### **Compliance Monitoring Report**

Please find enclosed your compliance monitoring report for the following activity. It contains important information which needs to be read carefully.

**Consent number:** CRC224104

**Location:** 107 Dawsons Road & 220 Jones Road, Templeton

**Description:** To discharge contaminants into air from an industrial or trade premise or process.

**Overall Inspection Compliance: Complies**

Thank you for complying with the resource consent conditions that have been monitored.

**Important:** *The Overall Inspection Compliance grade above relates only to the conditions monitored as part of this inspection. It does not change the status of previous grades received for other consent conditions. If you have received a non-compliance grade for other conditions, please continue to take appropriate action to achieve or maintain compliance.*

**Reminder(s)**

If you would like any further information regarding this report please do not hesitate to contact me.

Yours sincerely

**Tess Hindle-Daniels**  
Resource Management Officer

---

**Consent No:**        **CRC224104**

<b>Description of consent</b>	<b>Date Consent Number Issued</b>

<b>Location</b>	<b>Expiry Date</b>
107 Dawsons Road & 220 Jones Road, Templeton	03 Nov 2056

---

### **Conditions & compliance**

- 29     Utilising the PM<sub>10</sub> monitoring data collected under conditions of this consent, together with any other relevant and publicly available air quality monitoring data, the consent holder must obtain reports from a SQEP in air quality assessing compliance with Regulation 17(1) of the Resource Management (National Environmental Standards for Air Quality) Regulations 2004, on at least three occasions, being no later than:
- One month after the completion of perimeter bund formation;
  - Twelve months after the commencement of Stage 1 aggregate extraction; and
  - Five years after the commencement of Stage 1 aggregate extraction.

#### **Compliance Report:**

##### **Complies**

Fulton Hogan have obtained and provided the first SQEP report on PM10 data required under this condition. This report was prepared by Port Hill Limited and provided in November 2024 (C24C/257647). The report utilises the PM10 data from the instruments required under this consent and assess the data against Regulation 17(1) of the Resource Management Act (National Environmental Standards for Air Quality) as is required by this condition.

Environment Canterbury's Air Quality Science team have peer reviewed this report and advised that the methodology seemed reasonable, the T640x instrument is a good instrument to use, and that they agree with the conclusions drawn in the report (C24C/281056). As such, this condition can be awarded a compliance grade.

---

- 30     The reports required under Condition 29 (whether they be draft or final reports) must be provided to the CRC Manager within five working days of their receipt by the consent holder and the reports must at that same time be made publicly available on the consent holder's webpage (fultonhogan.com or any replacement consent holder's web address) and also be provided directly to Community Liaison Group members.

#### **Compliance Report:**

##### **Complies**

The PM10 report required under condition (29) was provided to Environment Canterbury in accordance with this condition. Furthermore, the report is publicly available on Fulton Hogan's Roydon webpage under the Reports heading.

---

- 31     Should any of the reports required under Condition 29 conclude that Regulation 17(1) of the Resource Management (National Environmental Standards for Air Quality) Regulations 2004 has been breached by the consent holder's *quarry activities*, then all *quarry activities* (with the exception of dust suppression activities) must cease upon

receipt of the reports by the consent holder and must not resume until a Regulation 17(3) compliant PM<sub>10</sub> offset developed by the consent holder and certified as appropriate by the CRC Manager has been fully implemented.

**Compliance Report:**

**Not operational**

See comments for condition (29), the report provided did not identify any non-compliances with Regulation 17(1) of the Resource Management Act (National Environmental Standards for Air Quality). Further, our Air Quality Science team have peer reviewed the report and agree with the conclusions drawn.

---

**General comments**

Grading of this inspection was informed by the provision and content of the PM10 report required under conditions 29 and 30.

**Date Inspected:** 11 Dec 2024

**Monitored By:** Tess Hindle-Daniels

Signature:

Resource Management Officer

**General information**

**Canterbury Regional Council Obligations**

Under Section 35 of the Resource Management Act 1991, the Canterbury Regional Council has a duty to monitor all resource consent exercised within its region, to make sure all the conditions are being complied with.

**Monitoring Frequency**

The frequency with which your consent is monitored will vary according to the type of activity your consent authorises, the conditions imposed and the extent to which you have complied with these conditions on previous visits. **If you fully comply with all conditions then frequency will reduce to the minimum set for the activity.**

**Costs**

It is the Council's policy to recover all actual and reasonable costs of compliance monitoring of resource consents. An invoice for the cost associated with monitoring your consent will be sent in due course.

**Do you require a Purchase Order on invoices?**

Environment Canterbury require a standing, 12 month Purchase Order for monitoring of consents. Once a Purchase Order has been raised through your internal channels, this can be simply added to your consent/s.

Please email our Finance team at [ar@ecan.govt.nz](mailto:ar@ecan.govt.nz) with your details using your Consent (CRC) number as a reference.
