

## Plant Safety Matrix Frequently Asked Questions

### What is the Plant Safety Matrix?

---

The Plant Safety Matrix is a digital tool that lets you easily search for, view, and manage safety compliance requirements for plant that will be used on a Fulton Hogan site.

### How do I access the Plant Safety Matrix?

---

You can access the Plant Safety Matrix by going to the dedicated link: [here](#) or via the Fulton Hogan website: [here](#)

### How do I search for a plant item?

---

Simply click 'Search all fields' and enter the name or keyword related to the plant item. The system will automatically filter and highlight matching results as you type, making it easy to find what you're after.

### How do I view the safety checklist for a plant item?

---

After finding your plant item, click the 'View' button next to it on the left. This opens the safety checklist for that item in a new tab, with all checklist items grouped into relevant categories.

### Is it possible to export the checklist?

---

Yes! You can export any checklist using the dedicated export buttons. Options include PDF and CSV for easy sharing or record-keeping.

### What are the guidance notes for?

---

Guidance notes provide further details on each compliance requirement. Review the guidance notes associated with each item to be sure you understand what is required.
